

Located within the Planegg biotech hub near Munich, Ethris is a technical innovator in the emerging field of messenger RNA therapeutics, an exciting alternative to gene therapies and protein-based drugs. The company has developed two technology platforms to enable the use of messenger RNA as a therapeutic agent: Stabilized Non-Immunogenic mRNA (SNIM®RNA) for transcript therapy, as well as proprietary delivery technologies for SNIM® RNA delivery. Ethris' focus is on the development of therapeutic mRNA for the treatment of respiratory diseases. Our technology helps to replace or augment missing or non-functional proteins that cause a disease, or introduce new proteins to modulate the course of disease or symptoms. We are committed to bring these new technologies to patients in need as quickly as possible

To strengthen our team, we are looking for a full-time employee for the next possible date:

### **Project Manager (w/m/d)**

The Project Manager is responsible for developing and executing a detailed project management plan for an assigned R&D project in collaboration with the Project Leader and internal and external stakeholders.
